PROFESSIONAL SUMMARY

Data analyst and IBM-certified data science professional with 29 years of experience owning and operating retail, manufacturing, and food-service businesses. Combines hands-on Python, SQL, and data visualization skills with a proven record of using data to drive pricing, inventory, and operational decisions. Fluent in translating business questions into clear analysis and communicating findings to non-technical stakeholders. Bilingual (English/Portuguese).

TECHNICAL SKILLS

Programming & Query: Python (Pandas, NumPy, Scikit-learn), SQL, Jupyter Notebook

Data Visualization: Matplotlib, Seaborn, Plotly, Folium, Dash; dashboards & reporting

Machine Learning: Classification, regression, clustering, model evaluation & tuning

Data Management: Data collection (APIs, web scraping), cleaning, wrangling, EDA; relational databases

Tools & Other: Microsoft Excel, Git/GitHub, Generative AI tools; stakeholder reporting

DATA SCIENCE PROJECTS

Predicting SpaceX Falcon 9 First-Stage Landing Success | IBM Applied Data Science Capstone 2026

- Collected and consolidated launch data from a REST API and web scraping, cleaning and structuring the dataset for analysis in Python (Pandas).
- Performed exploratory data analysis with SQL and visualizations, and built interactive Folium maps and a Plotly Dash dashboard to surface launch-site and payload trends.
- Trained and compared classification models (Logistic Regression, SVM, Decision Tree, KNN), tuning hyperparameters with GridSearchCV to identify the best predictor of landing success.
- Presented findings and recommendations in a stakeholder-ready report, translating model results into plain-language business insight. Code: [\[github.com/your-handle\]](https://github.com/your-handle).

PROFESSIONAL EXPERIENCE

Owner / Operator | Food-Service Business — São Paulo, Brazil 2000 – 2020

- Directed all operations of a food-service business for 20 years, using daily sales, cost, and inventory data to guide pricing, purchasing, and staffing decisions.
- Analyzed sales patterns to reduce waste and optimize inventory, improving margins and forecasting demand across seasonal cycles.
- Communicated performance metrics to suppliers, staff, and partners — the same translate-data-to-stakeholders skill core to an analyst role.

Owner / Operator | Clothing Retail & Manufacturing — São Paulo, Brazil 1991 – 2000

- Founded and ran a clothing retail and production operation for 9 years, tracking production costs, sales, and inventory to drive profitability.
- Used records and trend analysis to plan production volumes, set pricing, and manage supplier relationships.

EDUCATION & CERTIFICATION

IBM Data Science Professional Certificate | Coursera 2026

12-course program: Python, SQL, Databases, Data Analysis, Data Visualization, Machine Learning, Generative AI, and Applied Data Science Capstone. Credential ID: IA41SYHSK8PJ.

Bachelor of Social Communication | FIAM/FMU, São Paulo, Brazil 2001
